

Discover Vall d'Hebron Barcelona Hospital Campus

Healthcare, research, training and
innovation, at the service of patients of
today and tomorrow

Healthcare

We offer top level healthcare in almost all the medical and surgery specialities. Always focused on the patient.

Research

Continuous contact with patients inspires us to boost the biomedical research and the innovation in the diagnosis and medical treatments.

Training

We have a wide educational offer for all the training phases. More than 750 students do their internship at the hospital every year and we welcome more than 600 medical residents and professionals from more than 28 different countries.

Innovation

We promote the innovation at all levels. From practice, we identify needs from a multifaceted vision of healthcare and we transfer knowledge, skills and experiences. From the research, we concentrate efforts in finding solutions for new treatments and diagnosis.

Excellence

Vall d'Hebron Barcelona Hospital Campus stems from the sum of four excellent institutions in the biosanitary area, each of them specialized in a field of expertise, with frontline professionals and worldwide recognition. We aim to be recognised by citizens and professionals as an innovative organization in all of its activities, outstanding for its quality, that generates and promotes knowledge and contributes to the sustainable development of the healthcare system.

Vall d'Hebron Barcelona Hospital Campus

The Vall d'Hebron Barcelona Hospital Campus is an international institution in healthcare, research, education and innovation.

It is composed by four centres: the Vall d'Hebron University Hospital, the Vall d'Hebron Institute of Research (VHIR), the Vall d'Hebron Institute of Oncology (VHIO) and the Multiple Sclerosis Center of Catalonia (Cemcat), working together with the same pioneering spirit and a common goal: to improve health and wellbeing of citizens.

We have specialized units with frontline professionals trained to deal with the most complex cases in all stages of life, from before birth to elderly age.

This is how we contribute to society, adding talent at the service of patients of today and tomorrow.

(2016 data)

Vall d'Hebron University Hospital

Vall d'Hebron University Hospital is three hospitals in one: the General Hospital, the Women's & Children's Hospital and the Orthopaedics, Rehabilitation and Burn Hospital. It's the largest healthcare complex in Catalonia and one of the largest in Spain. We offer clinical assistance from birth to elderly age.

32,338 surgical procedures

62,653 hospital discharges

209,576 emergencies attended

466 medical offices

436 transplants

The Women's & Children's Hospital has the technical capacity to solve complex paediatric cases and serve patients from Catalonia and all over Spain. It's specialized in Paediatrics, Obstetrics, Gynecology and it's a reference center in Oncology, Congenital Heart Diseases, Neonatology, Fetal Surgery and lung surgery.

3,022 births

300,000 patients per year at the Women's & Children's Hospital

Vall d'Hebron Institute of Research

VHIR promotes research and biosanitary innovation. Its aim is to find and to apply solutions to people's health problems. VHIR takes a chance on disruptive research based on daily health problems arising from the hospital, with an international outlook. The Institute transfers to society the knowledge developed in their research lines is one worldwide reference in clinical trials.

4.328 impact factor

1,500 researchers

57 research groups

Vall d'Hebron Institute of Oncology

VHIO is the most important cancer research centre in Catalonia. With more than 200 professionals dedicated to the understanding of this disease, it's a worldwide reference, and covers from the biology and the genetics to the treatment of the disease. VHIO has one of the most active programmes in the country, based on a translational model that makes possible to move towards more personalized therapies to beat cancer.

4 main research programmes: preclinical, translational, clinical and core technologies

10.96 impact factor

Multiple Sclerosis Centre of Catalonia

The Cemcat is a reference center in the diagnosis and treatment of the multiple sclerosis. Its multidisciplinary team works for an early diagnosis and a personalized treatment, including neurorehabilitation therapies. Healthcare, research and education work together with a common mission: to improve the patient's quality of life according to his/her needs and decisions.

3,000 patients

20 clinical trials

All of our ability at the service of our patients
